

# How to Use

Do not mix Enzyme Wizard Glass and Stainless Steel Cleaner with any bleach, oxidisers, or other chemicals as this will de-activate the enzymes.

It is recommended that when starting to use the Glass and Stainless Steel Cleaner, new micro fibre cloths, and other equipment should be used. This is because any residual soap, or chemicals will adversely impact the effectiveness of the enzymes and the non-smear finish.

Spray Glass and Stainless Steel Cleaner on to surface to be cleaned.

Wipe surface with a paper towel, or clean micro fibre cloth until the cleaner starts to evaporate.

Polish to shine.
