How to Use

Do not mix Enzyme Wizard Carpet Shampoo with any bleach, oxidisers or other chemicals as this will de-activate the enzymes.

As some dyes are organic, always test for colour fastness in an inconspicuous area before using the Carpet Shampoo.

Carpets and Rugs
For Surface scuff marks on the carpet wet a micro fibre cloth with the Carpet Shampoo and then rub the mark.

For liquid spills, Enzyme Wizard Carpet and Upholstery Cleaner is recommended. Spray the stain and then rub with a clean, dry cloth as any dirt from the cloth will make the spot, or stain worse.

Enzyme Wizard Carpet Shamoo can be used in carpet shampoo machines and carpet steamers. Just mix at a ratio of 10:1 into the carpet shampoo chamber. For best results, it is best to wet down the carpet stains first with Enzyme Wizard Carpet and Upholstery Cleaner spray and then go over it with the carpet shampoo machine.

Soft Furnishings and Upholstery
For stains on soft furnishings, including pet beds, curtains, sofas, etc. Enzyme Wizard Carpet and Upholstery Cleaner is recommended. Spray the stain and then rub with a clean, dry cloth as any dirt from the cloth will make the spot, or stain worse. For deep staining, saturate the mark in order to penetrate any padding underneath which may also be carrying odour making dried matter.

For severe blood, sweat, urine, etc. staining, it is recommended that Enzyme Wizard Urine Stain and Odour Remover is used.

Please note that the enzymes in Carpet Shampoo will remove all organic stains from the carpet. It is important to take note if the stain is inorganic, such as tar, mud, soil, machine grease, etc. the cleaning process will take longer whilst the enzymes break down the "glue" that attaches the stain material to the fibres.

When treating a stain that has already been treated with a chemical-based product, the nature of the stain will have changed and the enzymes will need to work their way through the chemical that is now part of the stain. Additional applications of Carpet Shampoo might be required.
